

2025-2026 Course Handbook

Welcome to Centerburg High School

Each student is a special, unique individual with different likes, dislikes, interests, hopes, and goals. This course handbook has been prepared to help parents assist their student to select the courses that will best fit his/her needs. Wise and thoughtful decision-making is very important as high school courses are planned. It is hoped that, through careful study of this handbook, a better understanding of our programs and course offerings will be gained.

The curriculum at Centerburg High School has been developed to meet the State of Ohio requirements as well as local Board-of-Education-adopted standards. It is hoped that each student will be able to develop class selections that will meet the requirements and his/her interest(s) as well. The educational experiences that are offered by this curriculum will help students develop important knowledge, skills, habits, attitudes, and ideas to interact with today's complex world. The Centerburg High School Faculty and Administration stand ready at all times to lend any assistance necessary to interpret this course handbook and help students make good decisions.

CENTERBURG HIGH SCHOOL MINIMUM GRADUATION REQUIREMENTS

CLASS STANDING (Based on the number of credits earned)

0-5 credits - Freshman

6-10 credits - Sophomore

11-15 credits - Junior

16-21 credits - Senior

Students who have participated in interscholastic athletics, marching band, or cheerleading for at least two (2) full seasons as defined in the Student/Parent Handbook, while enrolled in grades 9-12, and as documented by the athletic director, may be excused from the high school physical education requirement. Students electing such an excuse shall complete one-half (0.5) credit of at least 60 hours of instruction in another course of study which is designated by the Board as meeting the high school curriculum requirements.

English	4.0
---------	-----

(Must include English 9, English 10, English 11, English 12)

Social Studies	3.0
----------------	-----

(Must include American History, Government/Economics)

Mathematics	4.0
-------------	-----

(Must include Algebra I, Algebra II, Geometry)

Science	3.0
---------	-----

(Must include one physical science, one life science, one lab science)

Physical Education	0.5
--------------------	-----

Health	0.5
--------	-----

Electives	6.0
-----------	-----

(Class of 2026+ will need 5.5 electives and 0.5 credit of financial literacy)

Total Credits	21.0
----------------------	-------------

KNOX COUNTY CAREER CENTER

One-Year Program List: Seniors only

Pre-Professional Mentorship Program and Construction Trades

Two-Year Program List

Automotive Technology, Building Trades, Business and Finance Academy, Chef & Catering, Collision Repair, Computer Networking, Computer Integrated Manufacturing, Cosmetology, Digital Media Design, Early Childhood Education, Health Technologies, Hospitality & Facility Care Services, Landscape & Architecture Design, Metal Fabrication, and Sports Medicine.

Career-Based Intervention (CBI)

CBI 10: At the Knox County Career Center – This is a one-year program designed to develop work skills and to motivate the sophomore learner to continue in a trade program during his/her junior or senior year. All CBI 10 students are in the Air Force ROTC program.

SCHEDULING GUIDELINES

Listed below are educational options and requirements to help you plan for your future.

4-YEAR COLLEGE REQUIREMENTS/RECOMMENDATIONS

<u>Course Area</u>	<u>Credits</u>
English	4 (English 9/Adv. English 9, English 10/Adv. English 10, AP English, CCP Comp I & II)
Math	4 (Algebra I & II and Geometry, and Intro College Math, CCP College Algebra, CCP Trigonometry, CCP Calculus or CCP Stats recommended)
Social Studies	4 (World History, American History, Govt/Econ, CCP Psychology or other social science)
Science	4 (physical science, biology, chemistry, and physics or anatomy)
World Language	2 or 3 (same world language rec—depending on the college & major requirements)
Fine Arts	1 (such as Band, Choir, or Art)
Financial Literacy	0.5 (Class of 2026 & beyond must take this as a stand-alone course)

2-YEAR COLLEGE REQUIREMENTS

<u>Course Area</u>	<u>Credits</u>
English	4
Math	4 (Algebra I & II and Geometry required)
Social Studies	3
Science	3 (Biology and Chemistry—depending on the college & major requirements)

COLLEGE CREDIT PLUS OPTION

Students have the opportunity to earn college credit while still in high school. In order to be eligible, students must be attending high school and must be approved by the Board of Education in the previous school year by March 31. A student must apply to the individual college, meet the college's criteria for admission, and be accepted. College applications for College Credit Plus are free. Each college sets its own admission requirements; that information is available in the student services office.

Participating students will receive both college and high school credit upon completing each course. The tuition is paid out of the funds which Centerburg High School would normally receive from the State Department of Education. All students are responsible for their own transportation. The program contains many potential benefits for the participating student, such as the following: 1) a wider curriculum, 2) early college credit, 3) early college adjustment, and 4) financial savings. Risks involved include the following: 1) individually meeting the demands of college, 2) increased study time, 3) classes may need to be taken at night, and 4) potential schedule conflicts with high school extracurricular activities. Each potential participating student and his/her parent are required by the State of Ohio to attend the College Credit Plus meeting (January or February) with our school counselor and return a signed intent form by March 31 in order to be eligible the following school year.

Students may participate in College Credit Plus at any college that offers the option and that has admitted them. The following includes two sample pathways at the Mount Vernon Nazarene University that a student could follow in order to have valuable college credits to transfer after graduation. Each admitting college will determine how they accept the transfer of credits from other colleges. It is best practice to communicate with the admissions department of the college if you plan to attend after high school to find out how these credits will transfer.

College Credit Plus Pathways

Mount Vernon Nazarene University & Partner High Schools

15 Hour Core Pathway

<i>Course Number</i>	<i>Course Name</i>	<i>Semester Credits</i>
ENG 1083	College Writing	3
ENG 1063	Introduction to Literature	3
PSY 1013	Psychology	3
MAT 1023/34	Pre-Calculus/Calculus	3-4
COM 1023	Public Speaking	3

30+ Hour Pathways

These pathways incorporate the core pathway above and build on it with the courses geared toward the named disciplines below.

(Minimum of 15 credit hours in each specific track)

STEM Pathway

Course Name	Semester Credits
Intro to Zoology	4
Calculus I, II, or III or Trigonometry	4 3
General Chemistry	4
Engineering: University Physics or Computer Science I	5 4
Total Credit Hours:	15

Education Pathway

Course Name	Semester Credits
Intro to Biology & Lab	4
Intro to Math Systems	3
Principles of Health & Fitness	2
Art/Music in the Western World	2
Educational Technology	2
US History to 1865 (or since 1865)	3
Total Credit Hours:	16

Health Science Pathway

Course Name	Semester Credits
Intro to Chemistry	4
Nutrition for Health Professionals	3
Zoology & Lab	4
Organic & Biological Chemistry & Lab	4
Total Credit Hours:	15

Business Pathway

Course Name	Semester Credits
Intro to Biology & Lab	4
Principles of Mgmt.	3
Macroeconomics	3
Spreadsheet Apps in Business	3
Principles of Accounting	3
Total Credit Hours:	16

College Credit Plus Pathways**Tentative Centerburg HS 60 Credit Hour Pathway (over 2 years)**

College course credit at Centerburg HS during 2025-26 will be awarded and transferable from North Central State College (NCSC). **Students who opt to take all courses would finish with 60 college credits. These courses are subject to change based upon college course availability, staffing, student demand, and other administrative factors.**

Fall - Junior Year

Course Number	Course Name	Credits
ENGL 1010	Composition I	3
PSYC 1010	Introduction to Psychology	3
MATH 1110	College Algebra	4
CHEM 1210	Chemistry I (not currently offered)	5
		15

Spring - Junior Year

Course Number	Course Name	Credits
ENGL 1030	Composition II	3
PSYC 2090	Abnormal Psychology	3
MATH 1130	Trigonometry	4
CHEM 1220	Chemistry II (not @CHS)	5

Fall - Senior Year

Course Number	Course Name	Credits
ENGL 2050	American Lit. I (not @ CHS)	3
POLT 1010	Am. National Govt (not @ CHS)	3
MATH 1150	Calculus I	5
BIOL 1230	Biology I (not @CHS)	4
		15

Spring - Senior Year***Some courses listed are online or on CCP campus**

Course Number	Course Name	Credits
ENGL 2180	British Lit. I (not @CHS)	3
ECON 1010	Intro to Economics (not @ CHS)	3
STAT 1010	Intro to Statistics	3
COMM 1010	Speech (not @ CHS)	3
SOCY 2010	Cultural Diversity (not @ CHS)	3
		15

HONORS DIPLOMA (2025-2026)

Students seeking an honors diploma need to satisfy seven of the following eight requirements:

- *4 years of English
- *4 years of Math
- *4 years of Science
- *4 years of Social Studies
- *World Language = 3 years (or 2yrs of 2 diff lang each)
- *1 Fine Arts credit (earned during grades 9-12)
- *GPA 3.5 on a 4.0 scale
- *ACT score of 27 or higher

HONORS DIPLOMA (2026 and beyond)

Students seeking an honors diploma need to satisfy seven of the following eight requirements:

- *4 years of Math
- *4 years of Science
- *4 years of Social Studies
- *GPA of 3.5 on 4.0 scale
- *ACT score of 27 or higher
- *World Language = 3 years (or 2yrs of 2 diff lang)
- *Earn 2 add'l diploma seals (not including the Honors Diploma Seal)
- *Experiential Learning: Field experience, OMJ Readiness Seal, Portfolio or Work-Based learning

ATHLETIC ELIGIBILITY**OHIO HIGH SCHOOL ATHLETIC ASSOCIATION**

Attention Athletes: By the OHSAA (Ohio High School Athletic Association) and the Centerburg Board of Education, an athlete must be passing 5 full credits each nine weeks to be eligible. In order to participate in fall sports, eligibility is determined by the fourth nine weeks of the previous year, not the yearly final grade. Classes taken during the summer do not count toward fall eligibility.

If you are a student interested in playing a sport in college, make sure you are in contact with the Centerburg Athletic Director, Guidance Counselor and the college coach to ensure you are eligible.

For more information, visit the NCAA Eligibility Center website at www.eligibilitycenter.org. All NCAA approved courses offered at CHS are noted in each course description.

REGISTRATION PROCEDURES

Minimum Number of Student Courses

All students must carry a minimum of six courses per semester (college courses count as two). Special consideration and exception will be made in the case of extended illness, transfer students, and other special cases.

How to Register

1. Read this manual thoroughly.
2. Determine the required courses and any deficiencies that need to be scheduled.
3. Select additional courses to complete your schedule. Discuss your proposed program with your parents, teachers, counselor, or others whom you feel can help you make a wise decision.
4. Students may only have one study hall on their schedule.
5. Students will submit course requests via the course request document. Complete it, sign it, and have a parent/guardian sign it. The course request will then be submitted to the counseling office. Parents and students need to understand the rules for involvement in such courses as band, choir, and journalism.
6. The master schedule is created after the students have selected their course requests. The appropriate number of classes is created depending on the requests. Schedule changes will be minimal and based upon teacher and principal discretion. Therefore, good decisions need to be made at the time the course request is completed.

Schedule Change Procedures

1. After the master schedule is made, students' course requests may not fit. All efforts will be made to replace the request with a similar course. Be sure to list several alternate options.
2. Schedule changes will be made for school counselor error, misplacement in a wrong course, or to fulfill graduation requirements.
3. All schedule change requests are conditional based upon administrator, counselor, and teacher approval. Some courses have limits to the number of students. The principal and school counselor have the right to question and/or deny the request to change..
4. A student may add/change a course until the end of the fifth day of each semester.
5. Extenuating circumstances may cause an exception to drop/add a course. The principal, school counselor, and the involved teacher(s) will deal with these cases individually.

CURRICULUM OFFERINGS

Course	Grade(s)	Credit
AGRICULTURE		
Intro to Agriculture 7 & 8	7, 8	0.00
Mechanical Principles	10,11,12	1.00
Agriculture, Foods & Natural Resources	9,10,11,12	1.00

AGRICULTURAL DEPARTMENT

Course Title	Open to grades	Credit	Prerequisite(s)
Intro to Ag. 7 & 8	7,8	0.00	None
Mechanical Principles	10,11,12	1.00	None
Ag, Foods & Nat. Resources	9,10,11,12	1.00	None
Animal & Plant Science	10,11,12	1.00	None
Greenhouse & Nursery Mgmt.	11,12	1.00	None
Ag. & Env. Systems Capstone	12	1.00	Permission of teacher
Env. Science for Ag & Natural Resources	10,11,12	1.00	None

If completed in the summer, 1/4 additional credit will be given for an SAE (Supervised Agricultural Experience) such as livestock, crops, garden, or job placement.
A student may not earn science credits by taking Agricultural classes.

COURSE DESCRIPTIONS

Intro to Agriculture 7 & 8

This course shows students how classroom learning translates into marketable skills. Through hands-on learning and local business involvement, students will engage in career-related experiences to acquire basic skills in various career fields. This provides students with tangible experiences to begin career decision making. Introduces students to the pathways that are offered in the Agricultural and Environmental Systems career field. As such, learners will obtain fundamental knowledge and skills in food science, natural resource management, animal science, plant science, power technology and biotechnology. Students will be introduced to the FFA organization and begin development of their leadership ability.

Agriculture, Foods & Natural Resources

****Credit: 1 Agriculture, Food & Natural Resources, 1/4 Credit for Outside Project if completed.** Animal Science will provide students with the opportunity to explore the many aspects of the livestock industry. During this course, students will study breeds of dairy cattle, beef cattle, equine, sheep, swine, and poultry. Students will look at animal breeding and reproduction, housing facilities, proper management practices, and feeding and nutrition. Judging and showing of some of these livestock breeds will also be included. The class will include a majority of classroom and laboratory time as well as shop time. Shop time will teach the basic principles of hot and cold metal work and an introduction to carpentry. Each student will create a woodshop project that will be displayed at the county fair. **FFA membership fee of \$15 is required.**

Animal & Plant Science

****Credit: 1 Animal & Plant Science, 1/4 Credit for Outside Project if completed.** Animal and plant science is a combination of the two industries. We will start the year with animal science. We will study the different aspects of the livestock industry. This unit will cover the Beef, Swine, Sheep, Goat, and Small Animal Science industries. The second half of the year will be spent with the Plant Science industry. Students will learn about plant growth and be able to spend a great deal of time in the new state of the art greenhouse. This class is very hands on and interactive between students. The majority of this class will be spent in the classroom and the laboratory. A portion of this class will be spent in the shop studying in-depth woodworking techniques. Each student will create an independent wood project for the county fair. **FFA membership fee of \$15 is required.**

Greenhouse & Nursery Management

****Credit: 1 Greenhouse and Nursery Management, 1/4 Credit for Outside Project if completed.** This class has the main focus of the growing, managing, and selling of greenhouse plants. The beginning of the year will be spent studying the plant industry with a quick review on plant growth requirements. We will perform many experiments throughout the year to increase plant growth efficiency. This class will be responsible for all greenhouse function and maintenance. They will "own" the greenhouse and facility. The second half of the year will be operating the greenhouse business and day to day operations for our greenhouse business. The majority of this class will be

spent in the classroom and greenhouse lab. Each member will create a fair project for the two fairs. **FFA membership fee of \$15 is required.**

Ag. & Environmental Systems Capstone

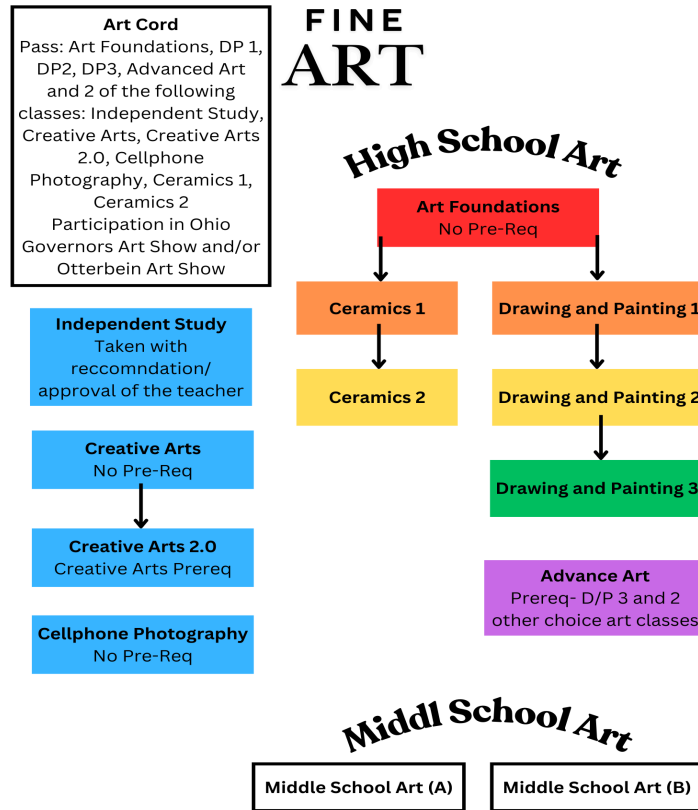

****Credit: 1 Agricultural Capstone 1/4 Credit for Outside Project if completed.** The main focus of this class is going to be community service. This is the last class offered in this program. Students will create, schedule, and perform many community service activities throughout the year. The members of this class will interact with all members of our program as well as many different community members. We will evaluate the needs of our community and strive to improve the quality of life in our school and Centerburg community. This will be a very student-led class with some input and guidance from the teacher. There will also be shop time where each student will work on an advanced woodworking project that will be displayed at the county fair. **FFA membership fee of \$15 is required.**

Environmental Science for Agriculture and Natural Resources

Students will study relationships between organisms and their environment. Principles of biogeochemical cycles, air-water-land relationships, non-point pollution, and wetlands will be applied. Students will examine fundamentals of resource development, agriculture sustainability, energy needs and pollution control. They will analyze and interpret data gathered from studies on the ecosystem. Throughout this course, students will develop responses to environmental problems and develop management strategies for responsible conservation and resource development. A mandatory class fee of \$15 is required by all students enrolled in any Agriculture course at Centerburg High School which allows them the opportunity to be members of the National FFA Organization. **FFA membership fee of \$15 is required.**

ART DEPARTMENT

Course Title	Open to grades	Credit	Prerequisite(s)
MS Art	6,7,8	0.00	None
Art Foundations	9,10,11,12	0.50	None
Drawing & Painting I	9,10,11,12	0.50	Art Foundations
Drawing & Painting II	10,11,12	0.50	Drawing & Painting I
Drawing & Painting III	10,11,12	0.50	Drawing & Painting II

Advanced Art	11,12	0.50	D&P; 3 add'l art classes
Independent Study Art	11,12	0.50	3 art classes & schedule conflict
Cell Phone Photography	9,10,11,12	0.50	None
Creative Arts	9,10,11,12	0.50	None
Creative Arts 2.0	9,10,11,12	0.5	Creative Arts

COURSE DESCRIPTIONS

Middle School Art - Students will lay a foundation for basic art concepts including proper use of materials as well as fundamentals. Students will learn a wide variety of art techniques by using different tools and materials, including tempera, pencil, pastel, clay, colored pencil and marker. Students will also be exposed to various artists throughout history. *This class is a mix of 6-8 grades.

Art Foundations - Students will build their basic fundamentals of art such as drawing, painting, art history, tool use, and care. Students will learn a wide variety of art techniques by using different tools and materials, including paint, chalk, charcoal, and clay.

Drawing and Painting I - *Prereq: Passing Art Foundations*

Students will be taking an in-depth look at drawing and painting. Students will use a variety of tools, materials and techniques to create drawings and paintings with depth and accuracy.

Drawing and Painting II - *Prereq: Passing D&P 1*

Students will be taught intermediate drawing techniques, drawing from life, imagination, and technical drawing. Students will be taught color mixing and accurate colors..

Drawing and Painting III - *Prereq: Passing D&P 2*

Students will be taught advanced drawing and painting techniques.

Ceramics I - *Prereq: Art Foundations*

Students will study 3D art forms through the use of clay. This class emphasizes various hand building techniques such as pinch, coil, and slab. Learning basic terms, equipment and techniques.

Ceramics II - Prereq: *Passing Ceramics I*

Advanced Art - Prereq: *Passing D&P I, II, III and have taken 2 other art classes.* *Earns Honor Cord

Independent Study Art - Prereq: students who have taken 3 art classes & cannot fit any other art course in their schedule.

Cell Phone Photography - Photography basics using your cell phone and some free apps. Explore all your phone has to offer to capture the best moments on “film.”

Creative Arts - Students will research and create various craft like projects. Students will create projects based on the 10 most prominent examples of fine art: drawing, painting, sculpture, architecture, ceramics, photography, printmaking, arts and crafts, installation, and literature. This class may require students to bring materials from home or visit the local craft stores and purchase materials for projects.

Creative Arts 2.0 - Creative Arts 2.0 will be a sequel to Creative Arts. This one will focus on creating works of art that also follow the prominent examples of fine art as well as incorporating different genres of art: Abstract, Geometric, Figurative, Minimalist, Pop Art, Surrealist, Impressionist, Text Art, Cubist, Hyperrealism.

CAREER TECHNICAL DEPARTMENT

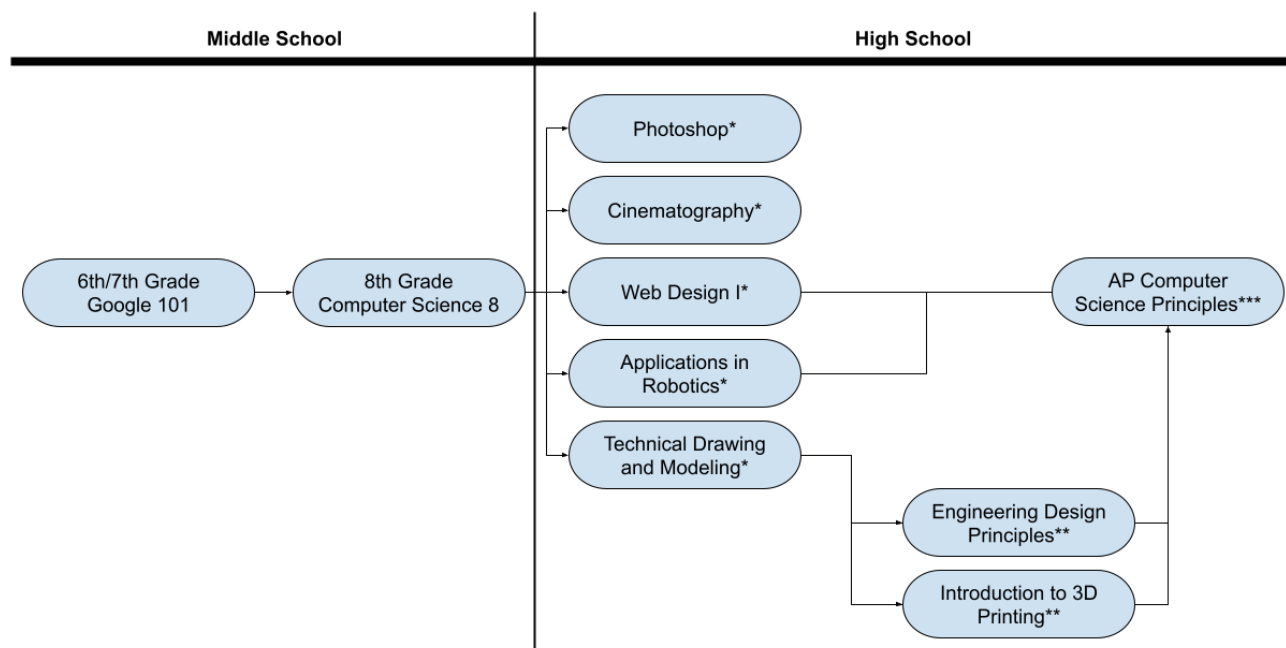

Course Title	Open to grades	Credit	Prerequisite(s)
CoOp (work study)	12	up to 4.00	None

COURSE DESCRIPTIONS

CoOp (Work Study)

Students will be enrolled in a CoOp Program through Centerburg high school. Students will be expected to have work placement at the start of the school year and remain employed through the duration of the course. Students will be expected to work a minimum of 15 hours per week. Students will maintain records each week and the instructor will perform field visits each quarter to check on student progress. Employers will be expected to fill out a workplace evaluation form each quarter on the student employees quality of work. Students are required to maintain passing grades in all their courses and maintain at least a 90% attendance rate at school in order to participate in the CoOp program.

COMPUTER DEPARTMENT

* These courses can be taken by any student at any time during high school.

** These courses require Technical Drawing and Modeling

*** Must have at least one Computer Science based course or have already obtained one full credit in Computer courses

Course Title	Open to grades	Credit	Prerequisite(s)
Computer Science 8	8	0.00	None
Photo and Video Editing	9,10,11,12	1.00	None
Yearbook	9,10,11,12	1.00	None
Technical Drawing & 3D printing	9,10,11,12	1.00	None
Engineering Principles and Design	10,11,12	1.00	None
Applications in Robotics	9,10,11,12	0.50	None
Unmanned (Drone) Aircraft I	10,11,12	1.00	
Unmanned (Drone) Aircraft II	11,12	0.50	

COURSE DESCRIPTIONS

Computer Science 8

In this class, students will examine the principles of artificial intelligence using a coding environment with AI extensions. Students will explore the 5 Big Ideas of AI in various ways. Students will also be exposed to how AI is used within the Robotics field.

Photo and Video Editing

In this course students will experiment with multiple different photo and video editing programs, learning to create content for professional graphic design use, social media content creation, marketing design, and hobby usage.

Yearbook

In this course, students will create Centerburg's Middle/High School yearbook, the Trohigan, from a blank canvas. Students will be required to capture and edit photos they have taken at sports and school events, clubs, and other school life experiences. Online tools, including Varsity's website and Canva, will be utilized for photo

storage, photo editing, graphic design, and yearbook creation and editing. An interest in photography and graphic design, the desire to attend school and extracurricular events (including but not limited to concerts, athletic events, club meetings, pep rallies, etc.), and the willingness to try and try again are desired. **Credit is not earned towards the 20 credits required by the State of Ohio. Credit can be earned for 1 local credit hour.

Technical Drawing and 3D Printing

Technical Drawing and 3D Printing Students will learn to create 3D content using OnShape CAD software, read schematic blueprints, and export to 3D printing. The focus of this course will not only be content creation but prototyping, mastery of 3D printer interfaces, and problem solving.

Engineering Principles and Design

Engineering Principles and Design is a course for students who are interested in going into an engineering field or construction management field. In this course we will focus on engineering processes, principles, and design as part of a project based learning course. Once students have demonstrated mastery of processes such as project management, design systems, and prototyping they will express that mastery working as a team on various hands-on projects.

Applications in Robotics

In this course, students will learn various concepts related to how robotics are used throughout the world. Students will utilize both block based and/or text based coding environments in order to direct the action and behavior of robots that they build. Students will develop an understanding of the logic that is developed which enables robots to make “choices” and allows the robot to have different outputs given different situations. Students will utilize the VEX EXP system and a variety of sensors, blocks, and motors to create these robots. In addition, students will be exposed to real world uses of robots in an effort to promote career pathways that involve robotics.

Unmanned (Drone) Aircraft 1

As part of this new course students will study the basics and introductions to aviation and unmanned flight. During the first half of this course students will receive an introduction to aviation, aerospace history, and basics of unmanned (drone) flight. Second half students will study the focus of drone flight, aircraft systems, aircraft performance, and Aerial photo/ video production.

Unmanned (Drone) Aircraft 2

In this course students will split the course between aviation studies and preparation for their FAA Commercial Drone License and hands-on flight training using our DJI Mavic drones. As part of this course we will prepare for the FAA licensing exam, drone operations, workforce success, career skills, and advanced drone technology.

ENGLISH DEPARTMENT

Course Title	Open to grades	Credit	Prerequisite(s)

COURSE DESCRIPTIONS

English 9

This course covers the basics of spelling, vocabulary, punctuation, parts of speech, usage, and composition. Students also study the elements of short stories and read selected fiction and nonfiction titles. Emphasis will be on grammar and writing. NCAA approved.

Advanced English 9

Recommend A or A- in English 8. This course is for the college-bound student who expects to be challenged in the areas of grammar and literature. Admission to the course is dependent upon OAT results, grades in English 8, students' (not the parents') desire, and teacher recommendation. The students will be expected to have knowledge of the basics of spelling, vocabulary, punctuation, parts of speech, usage, and composition on which to build. Students will study the elements of short stories and read selected fiction and nonfiction titles. Emphasis will be on grammar and writing. Advanced English 9 will collaborate with other subject areas on the culminating Freshman Project, a multi-faceted assignment. NCAA approved.

English 10

Students will learn basic grammar and usage skills in this course and receive instruction in research and writing in different genres, such as exposition, argument, and narrative. They will read a variety of novels, some as a class and some that students choose, and learn vocabulary from the literature. Students will also participate in speech activities, including class presentations. NCAA approved.

Advanced English 10

Recommend A or A- in English 9. This is an accelerated course for the serious student who expects to be challenged in the areas of writing in a variety of genres such as exposition, argument, and narration. Admission is dependent on grade point average of an A or A- in English 9, students' (not the parents') desire, and teacher recommendation. Students will read a variety of novels, some as a class and some that students choose. Students will also participate in speech activities. NCAA approved.

English 11

In this course, we will analyze both fiction and non-fiction in order to develop and strengthen critical thinking and interpretive skills. Furthermore, this course is designed to immerse you into different modes of writing—explanatory, narrative, and argumentative. A wide variety of activities that allow each student to express him or herself in a comfortable, creative way with a large amount of choice built in will be completed. In addition, there will be several times where you will be required to multi-task for long-term assignments and projects. NCAA approved.

AP English Language & Composition

This course focuses on many of the same skills taught in a college-level introductory composition course. Those skills include rhetorical analysis, argumentation, synthesis, and research, with a major focus on critical reading and writing, exploring a variety of texts from both pre-1900 and post-1900. NCAA approved.

English 12

In this course, we will focus on enduring texts that encapsulate various historical periods of literature. We will explore modes of writing in order to develop and strengthen critical thinking and interpretive skills with a major focus on research and synthesis. Also, we will complete several projects that will help prepare for life after high school, whether students are headed for higher education or the workforce. Furthermore, we will develop and present Senior Projects. There will be a wide variety of stimulating activities that allow each student to express himself/herself in a comfortable, creative way with choice built in. NCAA approved.

Creative Writing

Recommended B in the previous English course. The student will be given the opportunity to develop this creative outlet through additional writing experiences. Students often have the opportunity to experience expository writing in the classroom but have little time to develop imaginative writing. Creative writing allows them to promote self-expression, to explore various writing styles, and to strive for variety in diction, sentence structure, and format. The students will develop fluency, logic, clarity, and creativity, write from a variety of audiences, explore diverse modes and genres of writing, utilize evaluation and revision skills, focus on the steps of the writing process, and use available technology in the creative process. NCAA approved.

Greek Mythology

This course will give you an overview of the huge collection of stories explaining the creation of the world and the lives of the gods, goddesses, heroes, and heroines of Greek culture. The scope of the Greek myths is astounding. Greek myths have passionate love stories, adventure stories, superhuman tales, fairy tales, magical stories, tales of gods and monsters and beasts, and stories of witchcraft and sorcery. These myths have been inherited in the form of art and literature. In this course, students will learn the basic plots of several Greek myths, discuss common themes in Greek myths, discuss examples of contemporary use of terms from Greek mythology, and analyze artistic and literary works based on or inspired by Greek myths. NCAA approved.

Introduction to Journalism

Students will learn the basics of writing for a newspaper, including developing story ideas, interviewing, and how to write news articles, features, sports stories, and editorials. They will also study the basics of layout, design, and newspaper production. The course is strongly recommended for students interested in joining *The Trojan Crier* staff. Students may take it before they join the staff or while they are on the staff.

Poetry

Poetry transcends time and culture, predating even written text. As such, poetry is an integral part of the human experience. Through the analysis of a wide variety of poems, students will make conclusions on the role of poetry in cultures and societies. Students will also analyze how modern poetry influences their current culture. Students will be surprised to find that poetry is more accessible, more readable, and more relevant today than they might have thought. Open to grades 9-12. NCAA approved.

Leadership in Literature

Leadership in Literature will explore the portrayal of leadership across different literary genres. Students will study how authors define, critique, and shape leadership through characters, narratives, and themes. This course will research the qualities and complexities of leadership as presented in novels, plays, poetry, non fiction, and epic literature from a variety of cultural and historical contexts. Students will work with classic and contemporary texts to investigate what it means to lead, the challenges of leadership, and the impact of leaders on culture, societies, movements, and individuals.

Through close reading, discussion, and analysis, students will consider leadership from multiple perspectives, including moral responsibility, ethical problems or conflicts, power dynamics, and the relationship between leaders and their followers. The course researches the evolution of leadership ideals, from ancient heroic figures to modern-day political, social, and literary leaders.

Key themes will include: Traits, struggles, and triumphs of the heroic leader. Tyranny and the abuse of power: the dark side of leadership. Women and their leadership in literature. Leaders' acts in times of crisis: navigating conflict, war, and social upheaval. Vision, change, and innovation today's Transformational leadership. By the end of the course, students will have an understanding of leadership and its complex impact or influence on the human condition. *10th graders will be accepted on a teacher-referral basis only.

Stories of the World: A Survey of Multicultural Voices

Do you often wonder what life is like for people in other parts of the world? If so, this course is for you! In this English elective, students will explore a variety of texts, such as novels, short stories, poetry, and film, that represent voices and perspectives from Latin America, Africa, the Middle East, India, and Asia. The goal of this course is to expose students to such cultures and to broaden their understanding of the literature created by authors of those cultures and the experiences of the people who are part of those cultures. This course will engage students in processes of reading and analyzing, questioning, discussing, and reflecting, and researching

and presenting, while emphasizing the exploration of a text's cultural and historical importance and encouraging students to respond to literature as socially aware members of a community. Come open up your eyes to new worlds! Suggested grade levels: 10,11,12. NCAA approved.

Room to Read: Reading on Your Own Terms

Do you miss reading just for the joy of it? If so, sign up for this course! This English elective literally gives students a room to read for pleasure while expanding their knowledge and appreciation of literature. In this course, students will read only texts that they have chosen, texts of any topic or genre. The sole goal is to read, and students will be expected to read daily.

Students will also get to engage in one-on-one conversations with the teacher about the books they read and will be assessed on the number of books read throughout the semester. So, sign up for this course, and start making your "to read" list now!

Myth of the Future: Speculative Fiction and Modern Life

Speculative fiction is an umbrella term for fiction that departs from reality. Dive into the imaginative realms of science fiction, fantasy, horror, fairy tale, and more in this engaging English elective. Through the lens of short stories and longer contemporary works, students will explore how these genres reflect, critique, and illuminate aspects of modern life. From technological advancements to societal changes, we will examine how authors use speculative narratives to comment on themes such as identity, morality, and the human experience. Throughout the course, students will discuss the ways in which these narratives mirror our world and challenge our perceptions.

Key questions will guide our exploration: How does sci-fi envision the future? What social issues are highlighted in fantasy worlds? In what ways do these stories encourage us to think critically about our own lives and the direction of society?

Join us as we embark on a journey through the imaginative landscapes of science fiction and fantasy, discovering the power of storytelling to reflect our present and inspire our future.

NCSC Composition I (3-credit course at North Central State College)

Composition I is a writing intensive, theme-based course that facilitates the development of college-level writing skills. The student will compose papers using expository writing while incorporating one's own thinking with credible research using MLA format. The course emphasizes critical thinking, analytical reading, thesis development and deep revision of one's own compositions. The course also includes analysis of audience and theme in one's own writing and the writings of others, while developing the student's critical reading skills. *Requires proof of college-readiness through ACT exam or Accuplacer.* NCAA approved.

NCSC Composition II (3-credit course at North Central State College)

Prerequisite: Composition I

In this course, the student will continue to develop proficiencies in analytical reading, critical thinking, thesis development, deep revision and research of credible sources. Composition II emphasizes problem solving with writing-intensive assignments grounded in argumentation. The student will evaluate readings from historical, social and political perspectives. Examination of one's own position in relation to the audience and evidence facilitates awareness of a writer's ethical responsibilities. Research of multiple sources using APA format is required. By the end of Composition II, the student will have written a variety of texts, including at least one researched essay, with opportunities for response and revision. Students will also complete the elements of the Senior Project in this course, using their argument paper as the basis for their presentation. This format writing will total a minimum of 20 pages. NCAA approved.

FAMILY AND CONSUMER SCIENCES

Course Title	Open to grades	Credit	Prerequisite(s)
Transitions and Careers	7	0.00	None
Healthy Foods	8	0.00	None
Career & College Readiness	11,12	0.50	None
Financial Literacy	11,12	0.50	None
Principles of Nutrition & Wellness	9,10,11,12	0.50	None
Child Development	9,10,11,12	0.50	None

The mission of family and consumer sciences education is to prepare students for family life, work life, and careers in Family and Consumer Sciences by providing opportunities to develop the knowledge, skills, attitudes, and behaviors needed for:

- strengthening the well being of individuals and families across the life span.
- becoming responsible citizens and leaders in family, community, and work settings.
- promoting optimal nutrition and wellness across the life span.
- managing resources to meet the material needs of individuals and families.
- balancing personal, home, family, and work lives.
- using critical and creative thinking skills to address problems in diverse family, community, and work environments.
- Successful life management, employment, and career development.
- Functioning effectively as providers and consumers of goods and services.
- Appreciating human worth and accepting responsibility for one's actions and success in family and work life.

COURSE DESCRIPTIONS

Transitions and Careers - 7th grade course

Growing up is hard! Learning to be an adult and taking on adult roles and responsibilities takes practice. When we are taught the skills needed to make the transition from being a kid to becoming an adult, the road is much smoother! In this class, students will increase their fluency in Life Literacy: we will learn what it takes to be responsible consumers and healthy family members emotionally and financially. Over the course of the semester, students will analyze interests, aptitudes and skills to prepare for careers and transition through life. An emphasis will be placed on career planning, study skills, work ethics, team building, communication, leadership skills, and technology etiquette.

Principles of Food - 8th grade course

In this nutrition and cooking course, students will gain knowledge in common nutrients, food selection criteria, and apply preparation methods to promote a healthy lifestyle. Students will apply cooking methods, ingredient selection and nutritional information in the context of selected food dishes, then enjoy eating the meals they make in weekly labs. Throughout the course basic food safety and sanitation techniques will be emphasized.

Career & College Readiness

Prerequisite: 11th or 12th grade

Are you ready for your next step after high school? Students will research careers and occupations, review post-secondary admissions qualifications, learn about military options, develop interviewing skills and explore how to search for and participate in internships and apprenticeships. Additional topics will include principles and techniques of professionalism, networking, conflict resolution, negotiation, leadership and entrepreneurship. This course assists in completing the Ohio Means Jobs Graduation Seal.

Personal Financial Management

Prerequisite: 11th or 12th grade

Students will develop personal financial plans for individual well-being. Throughout the course, students will develop financial literacy skills to provide a basis for responsible citizenship and career success. Additional

topics will include analyzing services from financial institutions, consumer protection, investing and risk management. CTAG credit eligible.

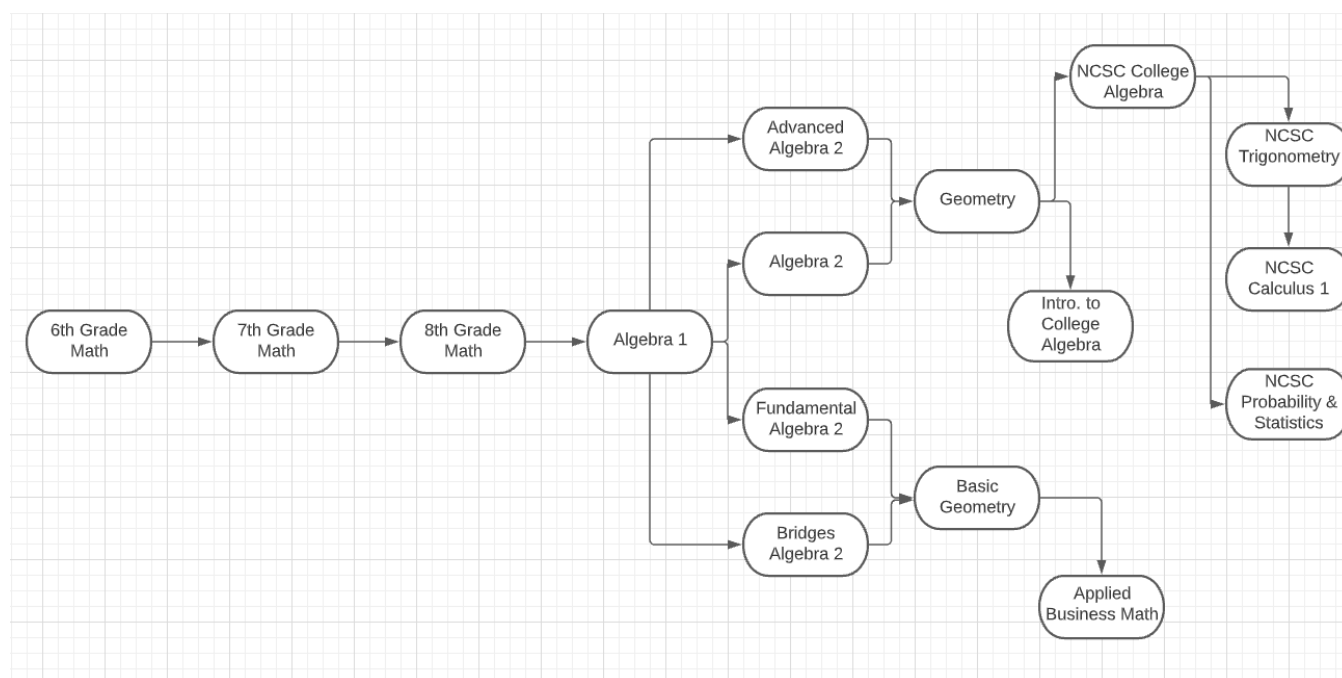

Principles of Nutrition & Wellness

An introductory nutrition course, students will use principles of nutrition to ensure a healthy body throughout the lifecycle. An emphasis will be placed on planning, preparing and enjoying meals with an understanding of nutrients and their benefits, portion control and dietary needs. Additional information will include steroid and supplemental use, body weight and management, and the implementation of physical activity to maintain a healthy lifestyle. This course is a great option for anyone interested in a career in the healthcare industry, athletes, culinary school, and anyone interested in living a healthy lifestyle.

Child Development

In this course, students will study the principles of child growth, development and behavior. An emphasis will be placed on the cognitive development of a child, and sensory and motor skills. Additional topics will include childhood diseases, immunizations, theories of development, learning styles and evaluating child care. Students will have the opportunity to experience a weekend of parenting with the "RealCare Baby®" project. This course is a great option for anyone interested in becoming a teacher, pediatrician, counselor, or child care worker, or for any student who plans on being a parent in their future.

MATHEMATICS DEPARTMENT

A graphing calculator will be required for all high school students. The mathematics department HIGHLY RECOMMENDS either a TI-83 or TI-84 Plus graphing calculator. Students are now permitted to use the TI-83 and TI-84 Plus on the ACT.

Course Title	Open to grades	Credit	Prerequisite(s)
Algebra I	8,9,10	1.00	None
Algebra II	9,10,11,12	1.00	Algebra I
Bridges Algebra II	9,10,11,12	1.00	Teacher Recommendation

Fundamental Algebra II	9,10,11,12	1.00	Algebra I
Advanced Algebra II	9,10,11,12	1.00	Algebra I
Basic Geometry	10,11,12	1.00	Algebra II (or equivalent)
Geometry	10,11,12	1.00	Algebra II
Applied Business Math	11,12	1.00	3 Math credits
Intro. to College Math	11,12	1.00	Algebra II
NCSC College Algebra	11,12	1.00	Algebra II, 22 in ACT Math
NCSC Trigonometry	11,12	1.00	NCSC College Algebra
NCSC Calculus I	11,12	1.00	NCSC Trigonometry
NCSC Intro to Statistics	11,12	1.00	College Algebra

COURSE DESCRIPTIONS

Algebra I

Algebra I extends the principles of arithmetic through operations with variables. Emphasis is placed on the structure of mathematics. Topics include solving and graphing equations and inequalities, working with exponents, and factoring algebraic expressions. *Students will take Algebra 1 in the 9th grade. Any 7th grade student wanting to take Algebra 1 as an 8th grader must have scored Accelerated or Advanced on the 7th Grade State Math Test, earned an overall B or better in 7th Grade Math, or have a Teacher Recommendation. (2 of the 3 criteria must be met)* NCAA approved.

Algebra II

This course starts with a review of Algebra I concepts. Additional topics include higher degree equations, logarithms, and rational functions. This course is recommended for college-bound students. *Students choosing to take Algebra 2 need to have an overall grade of a C or better in Algebra 1, score Proficient or better on the State Algebra 1 Test, or have a Teacher Recommendation. (2 of the 3 criteria must be met)* NCAA approved.

Bridges Algebra II

This course will cover some basic topics of Algebra II. Students will be able to graph functions such as linear, quadratic, and higher degree polynomials and learn how to solve basic polynomial equations mathematically. Bridges Algebra II satisfies the requirement for graduation. This course is NOT part of the College Prep Curriculum and is NOT recommended for the four-year-college-bound student. Students will be placed in Bridges Algebra 2 based on their Algebra 1 grade and State Competency Algebra 1 score. Teacher recommendation only.

Fundamental Algebra II

This course will cover many of the same topics as those covered in Algebra II but on a basic level. Students will be able to graph polynomial functions such as linear, quadratic, and higher degree polynomials and learn how to solve polynomial equations mathematically. This course does count towards the Algebra II requirement for graduation. This course is NOT part of the College Prep Curriculum and is NOT recommended for the four-year-college-bound student. *Students choosing to take Fundamental Algebra 2 need to have earned a D- or better in Algebra 1, score Competency or better on the State Algebra 1 Test, or have a Teacher Recommendation. (2 of the 3 criteria must be met)*

Advanced Algebra II

This course is designed for students who have excelled in Algebra I. Students will learn how to solve two and three variable equations, solve higher degree equations, use logarithms, solve rational equations, use probability to evaluate outcomes, and prove and apply trigonometric identities. This course is recommended for students who have strong math skills and are planning on taking NCSC College Algebra and Trigonometry and NCSC Calculus I. *Students choosing to take Advanced Algebra 2 need to have an overall grade of a A- or better in Algebra 1, score Accelerated or better on the State Algebra 1 Test, or have a Teacher Recommendation. (2 of the 3 criteria must be met)* NCAA approved.

Basic Geometry

This course will stress the basic concepts of geometry. It will focus on relationships between lines and angles; properties of polygons; perimeter and area; and constructions using a compass, protractor, and Mira's. *Students choosing to take Basic Geometry need to have earned 1 full credit of Algebra 2 (or equivalent).*

Geometry

This course studies the properties of polygons, circles, and solids. Concepts from algebra are used in problem solving, and deductive reasoning is used when working with proofs. This course is recommended for college bound students. *Students choosing to take Geometry need a C or better in Algebra 2/Advanced Algebra 2, or a B or better in Fundamental Algebra 2 and a Teacher recommendation.* NCAA approved.

Applied Business Math

Applied Business Math is a career-centered course designed to teach the types of math skills used in real-life jobs and personal finance. This class is not recognized as a college preparatory class. *Students choosing to take Applied Business Math need to have completed 3 math credits.*

Introduction to College Mathematics

The Introduction to College Math class is designed for 11th and 12th graders who have completed Algebra I, Geometry and Algebra II and are not taking NCSC College Algebra and Trigonometry. The goal of the class is to prepare college-bound students for math placement tests and introduce them to online assignments and tests that many colleges are offering in their modern math classes. The class starts with a review of Algebra II then gets into topics such as rational, exponential and logarithmic functions; trigonometric functions and identities; matrices; and analytic geometry and conic sections. *Students choosing to take Introduction to College Math need to have earned 3 credits of math (Algebra 1, Algebra 2, and Geometry) or have a teacher recommendation if the student earned credit in Fundamental Algebra 2 and/or Basic Geometry.* NCAA approved.

NCSC College Algebra (4-credit course at North Central State College)

A study of: 1) polynomial operations, rational expressions, exponents, radicals; 2) linear and quadratic equations, inequalities, absolute value applications and their graphs; 3) graphs of elementary functions and non-functions including inverse functions, combining functions, and translating and transforming functions; 4) polynomial functions including the Fundamental Theorem of Algebra, zeros of polynomials, rational functions, partial fractions; 5) exponential and logarithmic functions including graphs and applications; 6) Gauss-Jordan elimination and Cramer's Rule.

Requires proof of college-readiness on the ACT or the Accuplacer test. NCAA approved.

NCSC Trigonometry (4-credit course at North Central State College)

Prerequisite: C- or better in College Algebra

This course includes the study of trigonometric functions and inverse trigonometric functions and their graphs; solutions of right and oblique triangles and their applications; solutions of trigonometric equations and inequalities; the use of identities, vectors, and complex numbers; and solutions of polar equations and parametric equations. Students must supply a graphing calculator. NCAA approved.

NCSC Calculus I (5-credit course at North Central State College)

Prerequisites: College Algebra and Trigonometry, C- or better in Trigonometry

This course is a study of analytic geometry, limits, continuity, the derivative, basic differentiation rules, rates of change, the product and quotient rules, higher-order derivatives, the chain rule, implicit differentiation, related rates, extrema on an interval, Rolle's Theorem and the Mean Value Theorem. Function analysis includes increasing and decreasing functions and the first derivative test, concavity and the second derivative test, limits at infinity and curve sketching. Concluding topics include anti-derivatives, indefinite and definite integrals, the Fundamental Theorem of Calculus, and integration by substitution. Applications include optimization problems, Newton's method, differentials, and areas of planar regions. NCAA approved.

NCSC Introduction to Statistics (3-credit course at North Central State College)

This course introduces students to common statistical terms and concepts which are widely used to describe data, compute probabilities, estimate parameters, show the degree of relationship between variables, and to

make decisions. Emphasis is placed on “real world” examples and applications. *Requires proof of college-readiness on the ACT or the Accuplacer test.* NCAA approved.

MUSIC DEPARTMENT

Course Title	Open to grades	Credit	Prerequisite(s)
Middle School Choir	6,7,8	0.00	None
Advanced Choir- Middle C	9,10,11,12	1.00	Audition and Teacher Approval
Concert Choir	9,10,11,12	1.00	Teacher Approval
High School Music Technology	9,10,11,12	0.50	None
Middle School Band	6,7,8	0.00	All levels AND beginners
High School Symphonic Band	9,10,11,12	1.00	Teacher Approval
Instrumental Techniques	9,10,11,12	1.00	Basic notation understanding
Jazz Band	9,10,11,12	1.00	Band, Teacher Approval

COURSE DESCRIPTIONS

6th, 7th and 8th Grade Choirs

Middle school choir is for beginning and intermediate choral instruction. Any student is welcome to join and jump into learning about how to sing and perform. It will provide an understanding of the fundamentals of proper vocal and choral techniques, and music theory (as it applies to singers). We will also focus on learning the musical language, developing music literacy, and learning about various styles of music. Students will be prepared for future membership in continued vocal music participation. Choir is a co-curricular performance-oriented class with concerts outside of the school day. Performances will take place at the end of each quarter during the school year.

Middle School Music Technology

This course is designed for students interested in music, but who do not wish to perform. Over the semester students will be exploring the world of music technology and possible career paths in the music industry. The music technology class will equip students with a working knowledge of the industry tools for composition and notation, sound recording/engineering, web presence development and the history of commercial music in the United States. The class will develop students' understanding of basic computer systems and tools that the music industry uses as well as provide hands-on learning for basic recording and mixing techniques. The Music Technology class will equip the student with a working knowledge of the art of music through the use of software and hardware designed to assist in the creation, amplification and alteration of music. In addition to developing compositional abilities, experiences will include the development of skills needed to analyze and evaluate music. Students will continue to explore music's relationship with other disciplines and its impact on culture, and development of ability to perform, record, present, and discuss original compositions.

High School Music Technology

This course is designed for students who wish to explore various programs and web sites providing the student the ability to create, record, and share their own music. The students will be given the chance to compare and contrast systems and programs, the formation of sound and sound waves, the history of recorded sound, the development of MIDI, including the evolution of the sampling synthesizer, the music business and careers in music and music technology, the evolution of recording mediums, and arranging of melodies. An introduction to theater lighting and sound will also be a portion of the semester culminating in student roles in sound and lighting design and production for school concerts and events. **This class is co-curricular and requires students to meet outside of the school time during certain days.**

Advanced Choir-Middle C

This ensemble for grades 9-12 choral music department. This group is by **audition/teacher recommendation only**. Middle C is an all-year, all-inclusive, one-credit course. Students participate in all vocal activities while enrolled in the Choir. **All performances are mandatory.** This group is the face of the choral department and will

perform not only in the school concerts, but also in various community venues as well. The curriculum of the class explores choral music from a wide variety of cultures and time periods through study and performance with an emphasis on more challenging music than that performed in the Concert Choir. The core curriculum emphasizes the basics of vocal technique, sight-reading, music theory, and music history.

High School Concert Choir

Mixed ensemble for grades 9-12. High School Choir is an all-year, all-inclusive, one-credit course. Students participate in all vocal activities while enrolled in the High School Choir. **All performances are mandatory.** They occur three-five times throughout the school year. One credit will be given to those enrolled in the class all year. The curriculum of the class explores choral music from a variety of cultures and time periods through study and performance. The core curriculum emphasizes the basics of vocal technique, sight-reading, music theory, and music history. Bi-annually this choir travels to perform in a special music department trip.

6th Grade Instrumental Music/Band

6th grade instrumental music is open to anyone and everyone who would like to play a musical instrument. **New students must be sure to procure an instrument prior to the start of school.** The majority of students began playing in the 5th grade, although as many as 20% of the 6th grade band class consists of beginners. Homogeneous group lessons are a part of the band program, and individual lessons are offered as needed. The other aspect of 6th grade instrumental music is the band class, where students rehearse together on musical selections and method book examples that are grade-level appropriate. The 6th Grade Band performs two concerts per year. All band students may receive small group lessons either on a rotating basis or during a prescribed intervention period on a weekly and/or bi-weekly basis.

Middle School Concert Band

The Middle School Concert Band consists of both 7th and 8th grade students. The majority of band students attend band class daily, while a good handful also participate in vocal music 2-3 days per week during the same time slot. Students who are new to band will need to have the director's permission before registering for the class. All band members may receive small group lessons on either a rotating basis or during a prescribed period on a one or two week cycle, and should be willing to work by themselves diligently on their lessons in the method book. Band students will not need to miss any academic subjects to take group lessons. Band students can expect to have anywhere from 10-15 musical selections ready at a concert level by the end of the 2nd quarter. Students who are studying privately (*taking private lessons*) may be excused from small group music lessons as long as they are seeing their teacher each and every week for lessons. This level band student is also eligible for participation in the OMEA District X Honor Band and the OWU (Ohio Wesleyan University) Honor Band through director nomination.

Prerequisites: At least one successful year of band participation or study of an instrument and/or permission from the director.

8th Grade Band

8th Grade Band is mainly a preparatory ensemble for entrance into the high school band program. This group, while pairing with the 7th grade band for concerts and performances, works at a rather fast pace and covers much more advanced material than the 7th grade. Beginner lessons are offered for those interested in learning an instrument to play in high school. The 8th grade band performs 3 concerts per year along with the annual band competition trip to Kings Island. Depending on instrumentation and level of musical and social development, some 8th grade students may be invited to become early members of the CHS Trojan Pride Marching Band.

High School Symphonic Band

The high school symphonic band includes students across all four grades, and is a full year course. Course curriculum, scope and sequence includes the use of various texts that focus on areas such as proper warm up technique, chromatic fingerings and lip slurs, major scales and arpeggios, blend and balance of sound through use of chorales and tuning exercises. The music studied and performed in the symphonic band includes marches, ballads, holiday selections, overtures as well as programmatic works and larger and more challenging

titles for festival and/or competition. Students electing Symphonic Band should have successfully completed the middle school instrumental music curriculum and/or studied their instrument for a number of years. Students who may be on the beginner to intermediate levels (*those who have not participated in a band experience before*) will need to receive permission from the director before adding the class to their schedule. Students new to high school band (*students who have not played before in band*) are required to elect the class Instrumental Techniques so they get the help they need and move along on their instrument, eventually finding themselves on the high school band level. The symphonic band performs three school concerts per year. Other performances may be added throughout the year for things such as the OMEA Large Group Adjudication or possible performances at conferences or area schools at the discretion of the director, and may not necessarily be listed on the music calendar at the start of the school year. Students also have the opportunity to audition for groups such as the OMEA District X Honor Band, OWU (Ohio Wesleyan University) Honor Band and/or perform solo and ensemble selections at the annual OMEA Solo & Ensemble Adjudications. While there may be some exceptions due to health issues or scheduling beyond our control, all students electing the Symphonic Band Class are expected to participate in marching band during the late summer and fall.

Instrumental Techniques

Instrumental techniques is a multi-faceted class. One day students might be working on solos for a concert or OMEA adjudication and the next students will be taking part in a trio, quartet, or other small ensemble. Individual instruction is also given once per week in attempt to bring the student to the next level of musicianship. Individual journals on Google are kept and turned in at the end of each marking period so the teacher is able to grade your effective use of time. The class also touches on some aspects of music theory, history and composition utilizing web-based compositional sites such as NoteFlight, Musescore, Finale and others. This class is highly recommended for incoming Freshmen as well as those students who are in need of a challenge or need a little extra attention. It is also a must for any junior or senior who may be interested in playing at the college level or major or minoring in music.

Jazz Ensemble

High School Jazz Ensemble is a full-year course that meets outside of school hours as well in the period "0" 7:30 AM time slot on certain days.. Jazz band classes (rehearsals) include group, sectional and individual instruction. The music performed in the jazz band encompasses big band jazz from the 30's through modern day, and includes many different styles and genres of jazz. The jazz band performs at school concerts, jazz festivals and competitions as well as local performances. Students electing jazz band must be willing to practice at home the music assigned to them. Most student assessment is accomplished through determining how well the student is doing within the band, but some small group and individual playing examples are also necessary. Students electing jazz band must be active members of the high school band with honors band. The instrumentation for jazz band is as follows: saxophones (some students doubling on flute and/or clarinet), trumpets, trombones (+bass trombones), piano, string/electric bass, guitar, vibes, and some auxiliary percussion. Students are reminded that, although jazz band meets outside of the school day, it is still a graded, credited class and attendance is mandatory. It is not an extracurricular activity.

PHYSICAL EDUCATION AND HEALTH DEPARTMENT

Course Title	Open to grades	Credit	Prerequisite(s)
Physical Education 1 & 2	9,10,11	0.25	None
Physical Training & Sports Performance	9,10,11,12	0.50	CHS Athlete or Teacher Rec.
Health 10	10,11	0.50	None

Students who participate in interscholastic athletics, marching band, Junior Reserve Officer Training Corps (JROTC) or cheerleading for at least two (2) full seasons as defined in the student handbook while enrolled in grades 9 through 12 and as documented by the athletic director may be excused from high school PE. Students electing such an excuse shall complete one-half (0.5) credit of at least sixty (60) hours of instruction in another course of study which is designated by the Board as meeting the high school curriculum requirements.

COURSE DESCRIPTIONS

Physical Education 1 & 2

Students must enroll for a semester during both 9th and 10th grades. Physical education deals with the education of the student through physical activity. Individual, group, and team activities are stressed to help each student develop socially, emotionally, intellectually, and physically. Student involvement is the key to the student's learning in physical education. Lifetime sports are emphasized, along with the importance of staying physically active and fit. Some activities taught in physical education are touch football, team handball, pickleball, frisbee, softball, physical fitness, recreational activities, and badminton.

Physical Training & Sports Performance

This course is designed to assess and improve physical fitness levels, enhance sports performance, and encourage a healthy attitude toward lifelong fitness. Students receive theories and practical activities involved in obtaining and maintaining a healthy weight and appropriate level of fitness. This course is designed to prepare student athletes for competition purposes. It presents solid conditioning, weight-training, skill development, and team play combination of activities designed to prepare the athlete both physically and mentally. **Students must be a CHS athlete, have taken the lifting class previously, or have approval by the lifting teacher.** Class size is limited. **Credit is not earned towards the 20 required credits needed for the State of Ohio. Credit is earned for local requirements only.

Health 10

The health program is directed toward the interests and abilities of teenagers. This course places primary emphasis on the fact that health is a way of life. Major topics of study include Social, Mental and Physical Health. Areas of focus are relationships, mental health, nutrition and drugs, alcohol and tobacco education. This class will be "Real Life Stuff" based and we will discuss situations that happen in real life.

SCIENCE DEPARTMENT

Course Title	Open to grades	Credit	Prerequisite(s)
Physical Science	9	1.00	None
Biology	9,10	1.00	(Teacher rec, test scores & grades considered for 8th)
Zoology	11,12	0.50	Biology
Environmental Science	11,12	0.50	Biology
Botany	11,12	0.50	Biology
Chemistry	10,11,12	1.00	Algebra I & Physical Science
Anatomy	11,12	1.00	Biology or Chemistry. Teacher rec
Physics	11,12	1.00	Chemistry & Alg II

COURSE DESCRIPTIONS

Physical Science

This class takes a standards-based approach with activities and topics taken from chemistry, physics, and biology. This course will give students examples that connect with the students' own lives and relate to their communities. This course will cover science concepts and the mathematical relationships between them shown through algebraic equations. This course will cover the topics that directly correspond to the Ohio Graduation Standards. NCAA approved.

Biology

Biology is the study of living things and their interrelations and interdependence to each other. This course will cover topics including biological processes, cellular structure and function, diversity and interdependence of life, mechanisms of natural selection, genetic mechanisms and inheritance, and modern genetics. A student must take either Life Science or Biology to meet the graduation requirement for the State of Ohio. Freshmen who take this course must have a teacher recommendation. Grades from 8th grade science and test scores will also be

considered. Taking biology as a freshman sets a student on course to take chemistry as a sophomore, then at least one additional advanced science course is needed following chemistry. NCAA approved.

Zoology

An introductory survey of the nine major phyla of the animal kingdom. Zoology is the study of animal life and their anatomy, relationships and ecological interactions. Students will use various laboratory exercises to draw comparisons between various animal species. Labs in this class will include dissections. NCAA approved.

Environmental Science

Environmental science incorporates biology, chemistry, physics and physical geology and introduces students to key concepts, principles and theories within environmental science. Investigations are used to understand and explain the behavior of nature in a variety of inquiry and design scenarios that incorporate scientific reasoning, analysis, communication skills and real-world applications. NCAA approved.

Botany

Botany is a semester course that introduces the student to the plant kingdom and related ideas. Students will study local flowers, trees, etc. with an emphasis on field observations and laboratory exercises. NCAA approved.

Chemistry

Recommend B or better in science and math classes. This course enables students to study chemistry in a modern theoretical development. This course follows the presentation of chemical theory with emphasis on the structure and periodicity of the elements. The students will learn proper procedures and use of lab equipment. Calculators will be used throughout the course. NCAA approved.

Anatomy

This course will involve an in-depth introduction to all of the major systems of the body. Requirements will involve learning names, locations, and functions of anatomical structures. Dissection is included in the curriculum with a special emphasis on the muscular system. Must have a science teacher's recommendation. NCAA approved.

Physics

This college preparatory course will involve an in-depth look at motion, force, energy, wave motion, light, sound and nuclear reaction and their practical applications. Lab time will be spent analyzing theories put into action through mathematical, pictorial and graphical methods. Scientific calculators are required for this course. NCAA approved.

SOCIAL STUDIES DEPARTMENT

Course Title	Open to grades	Credit	Prerequisite(s)
Social Studies 9	9	1.00	None
American History	10	1.00	None
Government/Economics	11	1.00	None
World History Survey A	10,11,12	0.50	None
World History Survey B	10,11,12	0.50	None
Global History and Geography A	11,12	0.50	World History Survey
Global History and Geography B	11,12	0.50	World History Survey
What in the World is Going On? Current Events & World Geog.	9,10,11,12	0.50	None
Introduction to Psychology (high school)	9,10,11,12	0.50	None
History Through Film	9,10,11,12	0.50	None
NCSC Intro. to Psychology (CCP)	9,10,11,12	1.00	proof of college readiness
NCSC Abnormal Psychology (CCP)	9,10,11,12	1.00	Intro. to Psychology

COURSE DESCRIPTIONS

Social Studies 9

This course primarily covers world history from the Enlightenment Era (17th and 18th Centuries) to the present day. Students will learn about major events from the era, the people involved in them, what brought them about and the impact which they had. The course is also geared toward helping students develop and improve their study skills. NCAA approved.

American History - Grade 10

The scope of this program will be to enlighten the student about the flow of events in the United States from pre-World War II to the present. The course will be concerned with the data and concepts which provide the basis for understanding the idea of change and the America of today as it fits into the global scene. NCAA approved.

Government/Economics - Grade 11

American government focuses on all aspects of local, state, and national government. The course will explore the mechanics of politicking, political structure, and the law. The main goal of this course is to encourage civic responsibility. The course will include a thorough overview of the US Constitution and Amendments, the history and workings of the three branches of American Government, and the American economic system, with particular emphasis on comparisons with socialistic and communistic economic systems. Additionally, the laws of supply and demand with their applications to our system of sole proprietorship, partnerships, and corporations will also be discussed. The course will also concentrate on practical concepts such as stocks, bonds, mutual funds, the stock market, filing taxes, banking and financing. NCAA approved.

World History Survey A/B

This course chronicles people and events from ancient and medieval times. It is designed to delve into the history, traditions and cultures of various groups across the globe. Students will study people, places, events, eras and empires. The course is especially geared toward students who are preparing for college. Students may take World History Survey A or World History Survey B in any order. NCAA approved.

Global History & Geography A

The purpose of this course is to become familiar with the various regions of the world by studying their political, physical, and cultural features as well as learning the people and events which shaped them from ancient times to the present. The focus for this section will be on Europe and Asia. NCAA approved.

Global History & Geography B

The purpose of this course is to become familiar with the various regions of the world by studying their political, physical, and cultural features as well as learning the people and events which shaped them from ancient times to the present. The focus for this section will be Africa, the Americas and Australia. NCAA approved.

What in the World is Going On? Current Events/World Geography NCAA approved

Think of this course as a combination of current events and world geography. We will examine each day's current events from **CNN10 News** and **Student News Daily** and then explore more about the issues or countries mentioned in the news. We will keep a notebook to record several themes we see over the course of the semester:

- Geography to record where the news is happening each day and to consider the trends of which nations are featured in the news.
- Notable People who are mentioned and how they influence the events of the day.
- STEM news to highlight discoveries and key innovations in science, technology, engineering, and math.
- Good News! to record stories that inspire or motivate us for positive change.

Introduction to Psychology (high school course)

Psychology is a fascinating study of the way our human minds work and how our minds perceive the world around us. In this course you will analyze human growth, learning, personality, and behavior from the perspective of major theories within psychology. Specific topics we will explore in this course include the history, perspectives, and research of psychology; the biological aspects of psychology, learning, and cognitive development; the stages of human development and aspects of personality and intelligence; the classification and treatment of psychological disorders; and psychological aspects of social interactions. NCAA approved.

Scope and Sequence:

History and Methods of Psychology

- Topic 1: Perspectives in Psychology
- Topic 2: Areas of Specialization
- Topic 3: Scientific Methods

Biopsychology

- Topic 1: Neurological Bases of Behavior
- Topic 2: The Brain
- Topic 4: Sensation and Perception
- Topic 5: Motivation and Emotion

Developmental Psychology

- Topic 1: Cognitive Development
- Topic 2: Psychosocial Development
- Topic 3: Moral Development
- Topic 4: Personality Development

Learning and Memory

- Topic 1: Classical Conditioning
- Topic 2: Operant Conditioning
- Topic 3: Observational Learning
- Topic 4: The Nature of Memory

Psychological Disorders and Treatment

- Topic 1: Categories of Psychological Disorders
- Topic 2: Therapy and Treatment Techniques

Social Psychology

- Topic 1: Social Cognition
- Topic 2: Group Behavior
- Topic 3: Antisocial and Prosocial Behavior

History through Film

History through Film is not just an eat popcorn and watch movie class! This course offers students a unique way to explore significant events, people, and periods in American history by analyzing extraordinary stories represented in film. History is best told as a story, and each student can find relevance through making connections between the past and the present.

Students will learn by analyzing and evaluating each film being studied. We will use music, photographs, and primary source documents to investigate for historical accuracy. Assignments will center around critical thinking, research, and journaling to encourage personal reflection about how events of both the past and the present shape our lives and the future of our society. NCAA approved.

Possible films for study:

The West and Gilded Age Dances with Wolves, Bury My Heart at Wounded Knee, Far and Away

World War I Sergeant York, All Quiet on the Western Front, Warhorse

The 1920s The Great Gatsby

The Great Depression	The Grapes of Wrath, Cinderella Man, The Untouchables, Seabiscuit, Of Mice and Men, To Kill a Mockingbird
World War II	Saving Private Ryan, Hacksaw Ridge, Flags of Our Fathers, Letters from Iwo Jima, Unbroken, Fat Man and Little Boy, The Tuskegee Airmen
The Holocaust	Schindler's List, The Boy in the Striped Pajamas
The Korean War	M*A*S*H
Civil Rights Movement	42, Selma, Loving, Green Book, The Help, 12 Angry Men
Vietnam War	Platoon, Good Morning Vietnam, Born on the 4th of July
Cold War	Thirteen Days, Bridge of Spies, October Sky
Space Race	The Right Stuff, Apollo Thirteen, Hidden Figures
Women's Rights	Iron-Jawed Angels, On the Basis of Sex, Mrs. America, Norma Rae
1970s - 1990s	All the President's Men, Argo, Miracle
2000s - Present	World Trade Center, United 93, The Hurt Locker

NCSC Intro to Psychology (3-credit course at North Central State College)

This class is an introduction to theories and techniques used by psychologists for describing, explaining, predicting and influencing human behavior. Topics covered include learning, cognition, intelligence, motivation, emotion, personality and abnormal behavior. This course is online except for make-up tests, which must be proctored. Three online tests over three separate units. Must be able to complete discussion board forums and submit assignments via CANVAS. *Requires proof of college-readiness score on the ACT or Accuplacer test.* NCAA approved.

NCSC Abnormal Psychology (3-credit course at North Central State College)

This course will examine the definition, classification, origin, and treatment of abnormal behavior. Categories of disorders discussed will include personality, anxiety, mood, somatoform, dissociative, sexual, psychotic, developmental- related and addictive disorders. Research methodology in abnormal psychology, historical perspective, the assessment process, ethical issues and use of the DSM will also be emphasized. Prerequisite: PSYC1010. Please note outcomes are written to OBR standards using OBR language. Ohio Articulation Number 0SS017. This course also meets the requirements for OTM Social and Behavioral Sciences TMSBS. NCAA approved.

WORLD LANGUAGE DEPARTMENT

Course Title	Open to grades	Credit	Prerequisite(s)
Spanish I	9,10,11,12	1.00	None
Spanish II	9,10,11,12	1.00	Spanish I
Spanish III	10,11,12	1.00	Spanish II
Spanish IV	11,12	1.00	Spanish III

COURSE DESCRIPTIONS

Spanish I

Spanish I will provide the student with a general introduction to the Spanish language as follows: sound system, pronunciation, functional vocabulary related to everyday life, cultural information, and basic grammatical structures. Emphasis will be on the acquisition of the following four skills: listening, speaking, reading, and limited writing. There are two main objectives to the course. Foremost is to give the students the ability to carry on a simple conversation. The second is to provide the students with instruction that teaches a basic understanding of Spanish culture, vocabulary, and grammatical concepts. NCAA approved.

Spanish II

Prerequisite: C or better in Spanish I or teacher recommendation. Spanish II builds upon knowledge gained in Spanish I. This course will also reinforce the skills learned in Spanish I, which include listening, speaking, reading, and writing. Emphasis is on perfecting pronunciation, mastery of the basic grammatical structures, and increased communicative proficiency. Acquisition of functional vocabulary is expected. Students will be exposed to the past tenses and future, conditional, and subjunctive moods. Students will be expected to apply them in their writing and speaking. NCAA approved.

Spanish III

Prerequisite: C or better in Spanish II or teacher recommendation. This course builds upon knowledge gained in Spanish I and II. The course is a continuation and recycling of knowledge acquired in Spanish I and Spanish II as well as an introduction to new vocabulary, structures, and expressions. Students will be expected to expand their vocabulary range to include more sophisticated terms, and use advanced language expressions, verb tenses and grammatical concepts such as the pluperfect and the subjunctive mood. NCAA approved.

Spanish IV

Prerequisite: C or better in Spanish III or teacher recommendation. This course builds on the knowledge learned in Spanish I, II, and III and is conducted primarily in Spanish. Students communicate in the target language through interpersonal speaking and writing, presentational speaking and writing, and interpretive reading and listening to explore cultural themes. In addition to using the text, students use technology, watch films in the target language, give oral presentations and skits, and read short stories in efforts to increase their knowledge and fluency in Spanish. Cultural topics focus on the customs and traditions of the people of the Spanish-speaking world. NCAA approved.
